AbdulRahman Maniar

High School Graduate & Programmer in Dubai, UAE

BACKGROUND

I am a motivated student and passionate software developer dedicated to creating innovative solutions that make a positive impact. Currently balancing my academic journey with hands-on experience in app development and technology-driven projects, I enjoy transforming ideas into real-world applications.

PROJECTS

GardenX

Full-stack marketplace for a school farm that had grown from 2,500 kg to 100,000 kg of produce per year. Replaced multiple physical ledgers with a digital platform for ordering, payments, and inventory - processing 250,000+ AED in sales within 12 months.

SecuraBlock

Awarded 1st Place at RIT's 14th Annual Engineering Competition

An AI-powered Web3 security tool built to proactively identify vulnerabilities and secure decentralized blockchain ecosystems. The platform demonstrated strong conceptual depth and practical implementation, securing 1st Place in the Cybersecurity category at RIT's 14th Annual Engineering Competition.

BlockBanking

Awarded Best Project at Symbiosis University STEM Project Expo

A decentralized finance prototype driven by blockchain technology to modernize banking systems and offer transparent financial tracking. It earned Best Project and 1st Place at the Symbiosis University STEM Expo.

DataMan

Awarded 1st Place at Heriot Watt University Data Sciences Competition

A robust data analytics and management platform engineered to tackle and structure complex, real-world data challenges. The platform secured 1st Place at the Heriot-Watt University Data Sciences Competition.

Falak Academy

A school-internal course platform built so teachers and students could create and publish courses without the friction of tools like Coursera. Piloted with an "Introduction to Git & GitHub" course - 100+ completions.

Falak Bank

Awarded Bronze Prize at GEMS Innovation Challenge

A neobank focused on financial inclusion, providing accessible micro-loans and tailored financial services to individuals unable to afford traditional banking options. This initiative earned a Bronze Prize at the GEMS Innovation Challenge.
